

Ref. 845

## Description

Improve security with our flush-mounted electric lock. Reversible and boasting a 6.0 mm jaw depth, it's been tested for 200,000 cycles, ensuring durability.

Operable between -25°C to +50°C, with a robust 3250N breaking resistance, it adapts to diverse conditions. Features include delay action (sliding), reliable unlatching, and optional diode or varistor for customization.
